ANNOUNCEMENT

**Space for All – The 3rd Panhellenic ESERO Greece Symposium “Lands”
at Aristotle University**

Thessaloniki, 1/10/2026

The opportunities that Space offers as a source of inspiration, knowledge, and innovation will take center stage at the 3rd Panhellenic ESERO Greece Symposium 2026, titled “Space for All.” The Symposium will take place on Saturday, 3 October, at 9:45 a.m., in the Ceremonies Hall of Aristotle University. The Rector of Aristotle University, Professor Kyriakos Anastasidis, and Deputy Minister of Education, Religious Affairs and Sports Nikos Papaioannou will address the Symposium.

ESERO Greece (European Space Education Resource Office), the Greek Space Education Office of the European Space Agency (ESA), based at Aristotle University, organizes the event.

The Symposium celebrates science, technology, and education and aims to offer a unique experience of exploration and discovery for all ages, highlighting how science, technology, engineering, and mathematics (STEM) can be creatively connected with space exploration.

The event is aimed at teachers, school students, university students, families, and anyone interested in discovering the world of Space.

Participants will have the opportunity to learn about the work of ESA Education and ESERO through presentations by specialized scientists and professionals from the space sector, who will showcase the latest developments and career paths in the field of Space.

In addition, participants will discover educational programs and activities that bring Space into the classroom, while they will take part in interactive activities exploring

the connection between space science, everyday life, and education. They will also have the opportunity to participate in a quiz featuring numerous “space-themed” prizes, including a telescope, books, and more.

The event is open to the public, with online attendance available for those who wish to participate remotely. Certificates of attendance will also be provided.

More information about the program is available at: <https://esero.gr/esero-greece-symposium-2026/>

The event poster is attached.

We kindly request that this event be published, broadcast, and covered by the media.
