PRESS RELEASE

**Presentation of the Aristotle Racing Team Single-Seater Race Car at the
Aristotle Innovation Forum**

Thessaloniki, 15/5/2026

As part of the Aristotle Innovation Forum, the Aristotle University is organizing a presentation and demonstration of the single-seater race car developed by the student team Aristotle Racing Team (ART), titled “Demonstration of Aristotle Racing Team’s (ART) Single-Seater Race Car.” The event will highlight the dynamic potential of student innovation, applied engineering, and technological creativity. The activity focuses on the development, design, and construction of the ART single-seater race car by one of the most active student teams at the Aristotle University of Thessaloniki.

The team will conduct live demonstrations of the vehicle on Thursday, May 21, 2026, at 11:30 and 13:30, in the outdoor area of Pavilion 15 at the Thessaloniki International Fair. ART will also be present throughout the entire duration of the Aristotle Innovation Forum at Pavilion 15.

During the event, visitors will have the opportunity to see the team’s single-seater race car up close and learn about the technological solutions integrated into the vehicle, as well as the processes of design, construction, testing, and optimization.

The Aristotle Racing Team is a dynamic student team of the Aristotle University that combines scientific knowledge, mechanical engineering innovation, teamwork, and the practical application of engineering in the demanding field of race car design and manufacturing. Through its activities, students gain valuable hands-on experience under real-world conditions involving the development of complex technological systems, strengthening the connection between academic education, research, innovation, and industrial application.

The presentation of the Aristotle Racing Team at the Aristotle Innovation Forum highlights the role of the Aristotle University as a center for knowledge production, innovation, and technological advancement, as well as the importance of the active participation of young engineers in shaping solutions with an international perspective.

The Aristotle Innovation Forum—one of the most dynamic innovation forums in Southeastern Europe—is organized by the Aristotle University from May 17 to May 23, 2026.

The AIF is held under the auspices of His Excellency the President of the Hellenic Republic, Mr. Konstantinos An. Tasoulas. The AIF is supported by the Ministry of Education, Religious Affairs & Sports, the Municipality of Thessaloniki, and the Region of Central Macedonia, while the Thessaloniki International Fair serves as a strategic partner. Major sponsors include PPC and Piraeus Bank.

The event is open to the public.
