PRESS RELEASE

**Live 3D Printing Demonstration for the Public at the Aristotle
Innovation Forum**

Thessaloniki, 15/5/2026

A special live 3D printing demonstration for students and the general public will take place from Thursday, 21 May to Friday, 22 May 2026, from 10:00 to 13:00, at Pavilion 15 of the Thessaloniki International Fair (TIF), as part of the Aristotle Innovation Forum.

The event aims to familiarize the public with one of the most advanced contemporary technologies in design and manufacturing. Through the educational and hands-on nature of the event, participants will engage with cutting-edge technologies currently used in engineering, industry, research, medicine, product design, and the development of advanced materials.

As part of the event, visitors will have the opportunity to hear, learn, and see firsthand how 3D printing technology works through a live demonstration. The presentation will cover the basic principles of the process, examples of applications, and the way a digital idea can transform into a real object through additive manufacturing.

The Metallurgy Laboratory of the School of Mechanical Engineering and the Center for Research and Development of Advanced Materials (CERDAM) of the Center for Interdisciplinary Research and Innovation (CIRI/AUTH) of the Aristotle University organize the event.

The Aristotle Innovation Forum—one of the most dynamic innovation forums in Southeastern Europe—is organized by the Aristotle University from 17 to 23 May 2026.

The AIF takes place under the auspices of His Excellency the President of the Hellenic Republic, Mr. Konstantinos An. Tasoulas. The Forum is supported by the Ministry of Education, Religious Affairs and Sports, the Municipality of Thessaloniki, and the Region of Central Macedonia, while the Thessaloniki International Fair serves as strategic partner. Major sponsors include PPC and Piraeus Bank.

The event is open to the public.
