

## Welcome to the EPICUR Entrepreneurial Lab

You want to develop innovative solutions for the “Grand Challenges” and create impactful and innovative products? You see problems as challenges and as a source of inspiration?

As a practice-oriented entrepreneurship course, EPICUR Entrepreneurial Lab gives you the environment and enables you to develop the competencies you need to follow your visions and realise your ambitions!

Work in international and intercultural teams with entrepreneurial-oriented students, gain expert knowledge from experts and mentors from eight European universities, and develop innovative products for society and the environment!

### What you can expect:

- 9 week programme starting 05th Oct. 2021
- Work in international and intercultural teams
- Hands-on projects and practice-oriented entrepreneurship education
- Exclusive access to a European network of lecturers, trainers, start ups and business angels
- Theoretical input and practice-oriented training on personal values and competences, intercultural communication, opportunity recognition, business modelling and more
- Innovation projects with high economic, environmental, and social impact

- EPICUR Certificate (in development) for a successful participation

### Who can apply?

EPICUR Entrepreneurial lab is open to Master students from all faculties, who are currently enrolled at an EPICUR university and have an English language proficiency of B2 (CEFR) minimum.

### How do you apply?

Please find the latest information on the programme and the application procedure on the [EPICUR Inter-University Campus](#) (Entrepreneurship Education). **Registration Period: 22.06.-13.07.2021, 23:59.**

### The EPICUR Project in short

The ambitious EU-funded project EPICUR (The European Partnership for Innovative Campus Unifying Regions) aims to build an attractive innovative European University through the strategic EPICUR alliance consisting of eight European universities. Our vision is to create a university experience to prepare well-informed, open-minded and responsible European citizens capable of creating new knowledge and becoming drivers of transnational innovation. This means that the way we teach, we learn, we carry out research or develop innovation should embrace societal challenges, academic and technological developments and educational innovation.

Since the start of the ambitious EPICUR project, all eight partner universities are jointly experimenting with different approaches in multilingualism, Liberal Art & Sciences educational approaches, in student-centred curricular and cross-curricular programmes, and in new forms of mobility (physical, virtual, blended) via the (virtual) EPICUR Inter-University Campus.

### Questions?

Most questions will be answered by perusing the [EPICUR Course Catalogue](#). If you don't find answers to your questions about the EPICUR Entrepreneurial Lab, please write an email to [alexander.tittel@kit.edu](mailto:alexander.tittel@kit.edu) (Entrepreneurial Lab Coordinator)
